

UserInterfaceCallback

```
classDiagram
    class UserInterfaceCallback
    class JNIUserInterface
    class NullUICallback
    JNIUserInterface --|> UserInterfaceCallback
    NullUICallback --|> UserInterfaceCallback
```

The diagram illustrates a class hierarchy. At the top is the 'UserInterfaceCallback' class. Below it are two subclasses: 'JNIUserInterface' on the left and 'NullUICallback' on the right. A horizontal line connects the two subclasses, with a vertical arrow pointing upwards from the center of this line to the 'UserInterfaceCallback' class, indicating that both subclasses inherit from the base class.

JNIUserInterface

NullUICallback
